Please note there are 14 sites available, plus one feed for recording. Sites may be updated if there are any not attended consistently to allow for others who are interested. Please inform us if you are interested but not yet included. Please note that St. Paul's Hospital has been removed and Peace Arch Hospital added.

Date:
Tuesday, April 30, 2013, 12:00 - 1:00 p.m.

Objectives:
The learner will be able to:
1. Outline the controversies related to terminology used to describe an elder’s challenges of care.
2. Describe a theory of the neurobiology of aggression that occurs in the context of personal care.
3. Identify common triggers for self-protective behaviour arising in the context of care for elders with dementia.
4. Outline key strategies to minimize self-protective behaviour occurring in the context of personal care.

The UBC Geriatric Psychiatry Videoconference Rounds is a self-approved group learning activity (Section 1) as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada.
