Toronto Sheraton Centre

Mood and Brain: Molecular Markers, Neuroimaging, and Cognitive Neuroscience

Clinically Relevant Neuroscience!

Neuroscience is transforming clinical work in mood disorders at every level—from how brain networks process emotions to the molecules of mood itself! Join CANMAT and an international group of leaders in Neuroscience in a compelling conference that includes plenary lectures, clinical discussion panels, and engaging workshops! Join your colleagues from both neuroscience and clinical worlds in downtown Toronto for a provocative and exhilarating educational experience!

**Featured Plenary Speakers**

- Dr. Gerard Sanacora, Yale University—Ketamine and Neurotransmission
- Dr. Diego Pizzagalli, Harvard University—Neuroimaging
- Dr. Sidney Kennedy, University of Toronto—Biomarkers
- Dr. Paul Pavlidis, University of British Columbia—Genetics
- Dr. Francesco Leri, University of Guelph—Animal Models
- Dr. Jane Foster, McMaster University—Neuroimmunology
- Dr. Benicio Frey, McMaster University—Neurocognition
- Dr. Raymond Lam, University of British Columbia—Impairment in MDD
- Dr. Richard Bazinet, University of Toronto—Lipid Signaling in CNS
- Ms. Karen Liberman, Mood Disorders Association of Ontario - Stigma
- Dr. Lakshmi Yatham, University of British Columbia—Early Intervention
- Mr. Dave Gallson, Mood Disorders Society of Canada—Work Disability
- Dr. Jonathan Downar, University of Toronto—Transcranial Magnetic Stimulation

Plenary sessions, Interactive Workshops, and Discussions over two days!

ONLINE REGISTRATION AVAILABLE SOON!
