WHO SHOULD ATTEND
- Psychiatrists
- Psychologists
- Family Physicians
- Mental Health Professionals
- Nurses
- Residents
- Medical Students

WHY ATTEND
This year’s Clinical Neurosciences meeting "A Focus on Trauma, Addiction and Mood" promises to be a very exciting meeting. Our speakers offer a broad range of expertise on Addiction, from Dr. Gabor Mate’s talk on unique ways of looking at the personal experiences of people with addictions to Dr. Carl Hart’s novel research on people with crack Cocaine addiction. Trauma is an overarching theme of this year’s conference. Our first speaker Roberta Price will share her personal experiences of trauma and Dr. Will Panenka will present the concept of how Traumatic Brain Injury (TBI) affects patients with Substance Abuse and Mental Illness (SAMI). Mood Disorders talks will include Dr. Heather Robertson speaking about Ketamine in the treatment of Refractory Depression and Dr. Chris Gorman on Group Medical Treatment of Mood Disorders. We are sure you will find this conference both intellectually stimulating and practical for your clinical practice.
