The diagram illustrates the 2014 Public Realm at the University of British Columbia. It shows various buildings and facilities, including the Library, Precessing, Woodward Library, Woodward Instructional Resources Centre, Biomedical Research Centre, Health Sciences Parkade, and others. The map also highlights pedestrian pathways and vehicular routes, with different symbols indicating different types of pedestrian zones. The scale is 1:750, and the diagram includes annotations for context and planning. The key features include different types of pedestrian zones, vehicular routes, and open spaces, providing a comprehensive view of the campus layout.
**Option A – Shared Way**
- This is essentially a better version of the existing access.
- Works best if we have to provide fire access
- Could widen and add bollards for pedestrians
- Least expensive

**Option B – Road Drop Off**
- This is a better version of what was presented
- Provides dedicated walkway
- Does not provide completely separate parking/drop off from roadway
- Trees grove partially removed
- More expensive

**Option C – Separate Drop Off**
- It’s sort of what we talked about at meeting
- Lots of grade issues
- Provides completely separate parking/drop off from roadway
- Trees grove completely removed
- Most expensive

The options range from less to more. Options do not address fire access requirements, which are currently being reviewed.
2014 PUBLIC REALM

MATERIALS

STANDARD

- UBC Type 5
- 100mm Concrete
- Medium Sandblast Finish
- Saw-cut Joints

SPECIAL

- UBC Type 6
- 3000 x 1500 mm Panels
- Natural Grey Concrete
- Lt. Sandblast/Broom Fin.
- Saw-cut Joints

CROSSPATH PAVING

- UBC Type 5
- Basalt Pavers
- 150 mm X 150 mm
- Running Bond Pattern
- Mortar Set
- 100 mm Concrete Base

- Concrete seat wall w/resysta top
- Anti-skate boarding hardware
- Concrete base w/decking
- Flexible seating
- Se’lux 12’ Saturn 2 Cut-off
- Colour UBC Grey
- UBC Standard Inverted U
- Galvanized
