**From research evidence to clinical care**

**Session: Cognition and functioning**
- Neurobiology of cognition
  *Dr. Raymond W. Lam*
- Cognitive dysfunction in depression
  *Dr. Edwin Tam*
- Cognitive dysfunction in bipolar disorder
  *Dr. Ivan Torres*

**Session: “Hot topics” in mood disorders**
- Ketamine as a rapid-acting antidepressant
  *Dr. Heather Robertson*
- What’s new in bipolar depression
  *Dr. Astrid Vik*
- What’s new in psychotherapy for mood disorders
  *Dr. Kristjana Cameron*
- Repetitive Transcranial Magnetic Stimulation (rTMS) for depression
  *Dr. Fidel Vila-Rodriguez*

**Free public lecture (5:30-6:30 p.m.):**
Measurement-based care for mood disorders: We’ve got an app for that!

*Dr. Erin Michalak & Dr. Raymond W. Lam*

All are welcome to attend!
Please join us for a stimulating and clinically useful educational program, including a tour of the new Djavad Mowafaghian Centre for Brain Health, a translational neuroscience outpatient facility operated jointly by UBC and Vancouver Coastal Health.

The educational sessions will focus on new research findings that are directly applicable to clinical practice, delivered by clinicians in the Mood Disorders Centre.

We will also hold a session that is open to the public, featuring new online and mobile apps to help guide measurement-based care for people with mood disorders.

The full program is available at www.MoodDisordersCPD.ca.

Registration fees include a light lunch (12:00noon to 12:30pm) and coffee breaks.

We look forward to seeing you there!

Raymond W. Lam, MD, FRCPC
Director, Mood Disorders Centre,
Djavad Mowafaghian Centre for Brain Health
