Please note there are 14 sites available, plus one feed for recording. Sites may be updated if there are any not attended consistently to allow for others who are interested. Please inform us if you are interested but not yet included.

Date: Tuesday, October 28, 2014 - 12 noon to 1:00 pm

Objectives:

“Participants will learn about recent case law concerning advance directives and substitute decision making, particularly with respect to refusal of nutrition and hydration.

Also, the ongoing difficulties caused by the failure, over many years, of the provincial government to bring into force legislation allowing family members to consent to facility admission of incapable individuals will be discussed. The controversial use of extended leave under the Mental Health Act, due to this default, will be explored.”

The UBC Geriatric Psychiatry Videoconference Rounds is a self-approved group learning activity (Section 1) as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada.
