Lecture Title:

Trauma-Informed Practice

Learning Objectives:

In this session you will learn how the inpatient eating disorders program model of care has been strengthened through further integration of trauma-informed practice “TIP” principles including:

- How four key principles of TIP were considered in the identification of desired changes to model of care
- How a rapid process improvement workshop incorporated TIP Principals to strengthen our model of care
- Implementation, Challenges & Opportunities

Speaker:

Raymond Boutet BScN, EMBA, RN - Raymond has worked with BCMHSUS for 15 years in multiple roles. Ten years of his tenure was spent as a General Duty Nurse in the Child and Adolescent Psychiatric Emergency and over the last 5 years Raymond has had various leadership roles including the Clinical Resource Nurse for CAPE and the Clinical Nurse Coordinator of the Eating Disorders Intensive Treatment Service. Since receiving his EMBA in November 2013, Raymond has been involved in various projects within the Eating Disorders program and most recently was Lead for the RPIW that adapted Eating Disorders Model of Care. He has now assumed the role of Program Director of the Provincial Specialized Eating Disorder Program, Metabolic Program and the Woodstone Residence.
