

In partnership with Sun Yat-sen University, please join us for the

Henry Fok Ying Tung SYSU-UBC Medical Research Symposium in Cancer

May 7 & 8, 2019

BLUSSON SPINAL CORD CENTRE @ VGH

The UBC Faculty of Medicine is excited to present a great program including talks from leading cancer researchers at UBC and at Sun Yat-sen University in Guangzhou, China. Join us for engaging talks and lively discussions about innovation in cancer genetics, cutting-edge technologies, and novel treatments. Find out what the cancer treatments of tomorrow will be. There will be selected oral and poster presentations by students and trainees.

Cancer treatment requires a team-based, multidisciplinary focus and collaborative effort. Come, connect and collaborate! The symposium will be followed by wine and cheese receptions each day for opportunities to connect.

THE SYMPOSIUM

Second in a series of three medical research symposia funded by UBC alumnus Ian Fok, this symposium will feature talks by leading cancer researchers from Sun Yat-sen University and UBC, as well as lightning talks and poster presentations from our own trainees and students.

TOPICS

-  Immuno-oncology
& The Tumour Microenvironment
-  Biomedical Engineering
& Stem Cells
-  Resistance Pathways
& Comparative Genomics
-  Pathology
Advanced Diagnosis
-  Artificial Intelligence

RSVP

Please RSVP by visiting: www.med.ubc.ca/research/henry-fok-ying-tung-sysu-ubc-medical-research-symposium-on-cancer/

Students, postdoctoral fellows, and residents are invited to submit an abstract for a lightning round talk and poster presentation.
